

Operation instruction:

1. To make sure the unit work well, first press the TX on/off button to turn on the TX unit. The LED will flash fast.
2. Then turn on the RX by press the on/off button, the red LED light, few minutes late it turn to blue LED light. The blue LED light means that the TX has linked with RX.
3. Audio signal send to the TX via micro usb D+,D- GND. The speaker of the RX will work.
4. If the RX red Led keep light, not change to blue LED, that means TX need pair with RX one time. To turn off the RX, then press the on/off button of the RX for 5s. The blue LED and Red LED light alternately that means the RX is on the pairing mode, the TX will automatically pair with RX. When the blue LED light that means the units can work well.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
